

No Cost Training For Architects, Engineers and Specification Writers. The National Fire Sprinkler Association (NFSA) is a trade association representing the fire protection industry nationally for over 100 years. NFSA manufactures or sells no products. Rather its mission is the promotion of life safety and increased fire protection for the built environment. In 2006 NFSA delivered 33 Design Advantage Seminars to 1200 architects in 21 states. In addition NFSA delivered 18 training seminars to 1045 architectural students at universities nationwide.

This multi-media 6 hour seminar includes actual case studies, interactive discussions as well as an actual design study for a 4 story office building using both the International Building Code[®] and the NFPA 101 Life Safety Code[®].

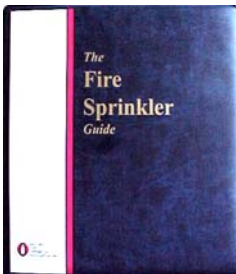

Fire Sprinkler Options in the IBC[®] and the Life Safety Code[®] G-13109

Learning Objectives

- ✓ How active fire protection can improve the design.
- ✓ Using active fire protection to control costs.
- ✓ How to use the included Fire Sprinkler Guide.
- ✓ Properly identify occupancy classifications.
- ✓ Choosing the best type of construction.
- ✓ Know where sprinklers are required.
- ✓ Selecting egress design options
- ✓ Understanding the sprinkler trade-up concept.
- ✓ Overview of fire sprinkler technology. *Greatly expanded for 2007*
- ✓ Project planning using the design advantage system when applying the International Building Code[®] or the NFPA 101 Life Safety Code[®].

CES Provider Connection Endorsed

Extra Bonus a \$200.00 Value Included at No additional cost

All attendees will receive a free copy of the completely updated 2007 Edition of the Fire Sprinkler Guide. This latest edition contains information on the 2000, 2003 and 2006 **International Building Code[®]**, the 2006 **NFPA 101 Life Safety Code[®]** and the 2003 **NFPA Building Safety and Construction Code[®]**. It also contains design information on the various NFPA installation standards for sprinklers systems.

Seminar Information

- Seminar date: May 4, 2007. Seminar registration 7:30 AM Seminar 8:00 AM till Noon
- Lunch Provided in the Exhibit Hall at Noon.
- **View over 100 exhibits and talk to representatives from all the major sprinkler manufacturers and many component manufacturers and suppliers from around the nation. A great opportunity to network with the vendors and have a first look at the latest technology in the industry.**
- Location: Red Rock Casino Resort, Las Vegas, NV

A Free Seminar, 6 AIA HSW Training Credit Hours , The Fire Sprinkler Guide and a once in a lifetime opportunity to see the latest in fire sprinkler technology all at No Charge

Registration: Pre registration is required space is limited see registration information

The Instructor

Gene B Endthoff, CBO, is recognized as a qualified instructor and has over 40 years experience in the construction industry. He is also an approved trainer for International Codes Council. His experience in building code development (formally Director of Codes for the NFSA), as a Certified Building Official, as a design draftsman for the Pre-fab and modular industry, and general contractor has given him tremendous hands-on knowledge that he can share with the attendees .

Comments from Attendees

"One of the best, if not the best seminar I have ever attended", "Excellent!! Best organization ever"

"Very beneficial for plumbing/fire protection engineering and relation between engineering and architect & all applicable codes. Outstanding presentation"

"Handout material very helpful, Workbook was well organized Excellent"

"Instructor was well prepared and expressed himself very well"

Well done! Very informative and entertaining. You took a possibly boring subject and made it interesting for 6 hours

Everything was very professional and organized

 YES! Please register me for the FREE Seminar.
