Textbook Inventory Reduction Sale! More than 50% off!

The NFSA's incredibly popular textbook, ***Layout, Detailing and Calculation of Fire Sprinkler Systems***, with more than 700 pages of information, is the most complete text ever written for the fire sprinkler engineering technician, and it's going on sale! **While supplies last**, get this hot study guide for only $60 plus shipping and handling for members or $90 plus shipping and handling for non-members.

Written by the NFSA Engineering Department staff and edited by Kenneth E. Isman, P.E., Vice President of Engineering, this text covers every aspect of determining the necessary details for a fire sprinkler system including: hazard classifications, sprinkler spacing, hanger and brace requirements, hydraulic calculations, water supplies, pumps and tanks. The text also contains a significant review of basic math and physical science that is helpful to the user in understanding the scientific principals behind the requirements that need to be followed.

This text makes an excellent self-study guide for the NICET Automatic Sprinkler Layout and Detail certification program and covers all of the work elements necessary to achieve Level 2 certification and many of the elements needed to achieve Level 3 and Level 4 certification.

Even if you are not studying for a NICET exam, this text makes an excellent self-study guide for anyone wanting to know more about fire sprinkler systems. Based on the 2002 edition of NFPA 13, NFPA 13R and NFPA 13D, the text covers the basic rules and can also easily be used with newer editions. To get your book, fill out the following form and return it with payment to the NFSA by fax or mail.

Order Form for ***Layout, Detail and Calculation of Fire Sprinkler Systems***
